

Job Description

The purpose of this role is to strengthen the Production Engineering side of CoolLED's business to help meet our short, and longer-term strategic goals.

The role will suit someone who is a skilled Production Engineer who is looking develop into a more senior role.

Supporting our production process is at the core of this role. The successful applicant will be expected to develop positive, supportive relationships with a positive can-do attitude. The successful applicant will also be expected to delegate for the Production Engineering Manager in their absence.

This position is based at our headquarters in Andover. You should consider the role as office based but we are comfortable with working from home when it suits the project or work package.

This position reports to our Production Engineering Manager

Why join CoolLED?

CoolLED designs, manufactures and markets cutting-edge LED illumination systems for microscopy, advancing biomedical research and other high-tech industries. There are many reasons to join the team, and here are just a few...

- **Make a difference:** We are proud of our role as a trusted supplier to leading global brands such as Olympus and Nikon, and also as a pioneer of research into illumination technology in collaboration with leading universities.
- **Team spirit:** Everyone in our team contributes to the success of the company. We are seeking like-minded individuals to join us and enjoy a role which stimulates and is rewarding. Working at CoolLED, you will be a part of a family-style team who often get together for social or charity events.
- **Being greener:** Our technology replaces toxic, energy-hungry mercury-based illumination. This emphasis on sustainability runs through the whole of CoolLED, and you can be part of our constant drive to reduce our environmental impact.

"It's fascinating to be at the forefront of technology and see how an idea is transformed into a product that brings real-world benefits to some of the most respected scientists around. You feel part of something, and your colleagues will always go out of their way to help you do your bit." Dr Isabel Goodhand

About this role

As a Production Engineer, you contribute to the Production Engineering team to success by:

- BoM Maintenance through our ERP system (Priority experience would be an advantage)
- Concession management from end to end
- Product Change Management through our ECR/N Process
- Drawing creation and changes using Inventor 3D CAD
- Equipment Maintenance and Calibration
- Creating Product Build Instructions
- COSHH control and Risk Assessments
- Supplier Quality Investigations using Quality tools like 5 why's or 8D and Vendor Returns
- SPC, Six sigma, lean manufacturing, NPI knowledge and/or experience desirable.

How do you make an impact?

As a Production Engineer, you have the opportunity to be a key part of the CoolLED team supporting production and supporting processes as well as the introduction of exciting new products into our range. Acting as Delegate for the Production Engineering Manager in their absence. Ensuring the Production Team have everything they need to complete products and maintain the impressive OTD. Ensuring that products also match our commitment to quality.

Our current product range is largely aimed at the fluorescence microscopy market. We were one of the first companies to introduce LEDs as the excitation source, at the time replacing the Hg and metal halide bulbs. Our products have given scientists and lab managers a much more convenient and controllable tool that allows them to do their work more effectively and get more reliable results.

We think this position is right for you if...

- Have a natural desire and drive to look for improvements in production processes
- Can manage multiple projects in parallel
- Have a disciplined approach to your work and a focus on completing tasks to a deadline
- Have an attention to detail and ability to self-check work
- Are a team player and willing to support other elements of the wider business
- A hands-on person who is prepared to get involved with tasks
- Willing to learn and develop yourself and to keep abreast of developments in production technologies and processes
- A confident communicator able to deliver information and reports at all levels from shop floor to Director

This position is based at our headquarters in Andover. Staff are expected to be willing to travel as their role requires to visit customers, suppliers, and partners worldwide.

What CoolLED offers...

- A positive and inclusive working environment

“I am able to adapt my chosen working hours around personal commitments and preferences which is so attractive. Being able to work a full week, interact effectively with my colleagues, and have a degree of freedom is fantastic!” *Luther Hindley*

- A 37.5 hour working week
- Flexible working hours to optimise your work/life balance
- 25 days personal vacation + 8 statutory bank holidays
- **Eligibility for a Hybrid working pattern**
- Competitive salary plus a company profitability bonus
- Life Assurance / Death-In-Service benefits
- **Contributory** pension scheme
- Health Insurance (optional at cost for employee’s family)
- Parent company (Judges Scientific PLC) Share Incentive Plan
