

WEEE Regulations Compliance Statement

The European Union's Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 became law in the UK on 1st January 2014. There are a number of obligations imposed on CoolLED Ltd as a "Producer" of certain qualifying electrical and electronic equipment.

CoolLED supplies products Business to Business. CoolLED's compliance approach for each of these obligations is provided below.

WEEE Marking

All qualifying products that are subject to the WEEE Directive and supplied by CoolLED are compliant with the WEEE marking requirements. Such products are marked with the "crossed out wheelee bin" WEEE symbol shown below and in accordance with European Standard EN 50419.

CoolLED Certificate No: WEE/GB4236XX

Information for Users

The WEEE symbol on the product or on its packaging indicates that the product must not be disposed of with normal household waste. Instead such marked waste equipment must be disposed of by arranging to return to a designated collection point for the recycling of waste electrical and electronic equipment. Separating and recycling this waste equipment at the time of disposal will help to conserve natural resources and ensure that the equipment is recycled in a manner that protects human health and the environment.

CoolLED offer a take-back program that enables CoolLED resellers and end-users to send back used CoolLED Illumination Systems for recycling, **free of charge**. Qualifying products are marked with the WEEE symbol shown above.

Together we can reduce the burden on our environment through responsible disposal and recycling of End-of-Life Illumination Systems. You can help us by filling in our [online contact form](#) and providing us with your contact details and the serial number of the CoolLED Illumination System that you wish to return.

The normal product return policy will be applied with pre-authorisation required in the form of RMA Number without which product will not be accepted.
