Role: Electronic Engineer

Job Description

The purpose of the role is to design the electronic hardware fundamental to the CoolLED product range, putting the 'control' in our byline 'simply better control.'

This position reports to our Engineering Manager.

Why join CoolLED?

CoolLED designs, manufactures, and markets cutting-edge LED illumination systems for microscopy, advancing biomedical research and other high-tech industries. There are many reasons to join the team, and here are just a few...

- **Make a difference:** We are proud of our role as a trusted supplier to leading global brands such as Evident (formerly Olympus), Leica and Nikon, and also as a pioneer of research into illumination technology in collaboration with leading universities.
- **Team spirit:** Everyone in our team contributes to the company's success. We seek like-minded individuals to join us and enjoy a role that stimulates and is rewarding. Working at CoolLED, you will join a family-style team that often gets together for social or charity events.
- **Being greener:** Our technology replaces toxic, energy-hungry mercury-based illumination. This emphasis on sustainability runs through the whole of CoolLED, and you can be part of our constant drive to reduce our environmental impact.

"It's fascinating to be at the forefront of technology and see how an idea is transformed into a product that brings real-world benefits to some of the most respected scientists around. You feel part of something, and your colleagues will always go out of their way to help you do your bit." Dr Isabel Goodhand

About this role

As an Electronic Engineer, you will contribute to the success of the Engineering Department by:

- Being fully responsible for the delivery of electronic hardware.
- Overseeing the continued development of our design tool (Altium) and the associated component libraries.
- Assuming responsibility for maintaining and developing electronic supplier relationships.
- Taking a technical lead in the electrical aspects of product compliance.
- Providing engineering support for non-product-related department initiatives that require electronic design input.

How will you make an impact?

As an Electronic Engineer, you will have the opportunity to impact the commercial success directly by designing electronic hardware for patented light source technology which is leading the way in the arenas of fluorescence microscopy and hyperspectral imaging.

We think this position will be right for you if...

- You eat, sleep and breathe electronic design.
- You have a Master's Degree in Electronic Engineering or similar.
- You have good experience with the ground-up development of electronic hardware.
- You have a sound knowledge of mixed-signal design principles.

This position is based at our headquarters in Andover and is eligible for Hybrid working. Staff are expected to be willing to travel as their role requires them to visit customers and partners worldwide.

What CoolLED offers...

"I am able to adapt my chosen working hours around personal commitments and preferences which is so attractive. Being able to work a full week, interact effectively with my colleagues, and have a degree of freedom is fantastic!" *Luther Hindley*

- A positive and inclusive working environment
- A 37.5-hour working week
- Flexible working hours to optimise your work/life balance
- 25 days personal vacation + 8 statutory bank holidays
- Eligibility for a Hybrid Working Pattern
- Competitive salary plus a company profitability bonus
- Life Assurance / Death-In-Service benefits
- Contributory pension scheme
- Health Insurance (optional at cost for employee's family)
- Parent company (Judges Scientific PLC) Share Incentive Plan

If you have any questions about this role or would like to apply with your CV/resume and a covering letter, please contact us at jobs@cooled.com

CoolLED's Mission

To contribute to science by developing illumination systems that enable research and provide the technology to improve people's lives.

Our Values

Ambitious

in being the best in our industry in all aspects of the business.

Pioneering

in creating ideas to solve problems.

Fair

respecting the people and environment with/in which we work.

Committed

to adding value in everything we do for the benefit of our customers, staff, shareholders, partners and suppliers.

Supportive

in developing and retaining great people allowing them to play to their strengths.
